Art Unit: 3751

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, drawn to a method for lowering a toilet lid, classified in class 4, subclass 661.

II. Claims 15-19, drawn to a toilet lid, classified in class 4, subclass 242.1.

The inventions are distinct, each from the other because:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a process not requiring determination of an area of interest.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to divergent fields of search, restriction for examination purposes as indicated is proper.

2. During a telephone conversation with James F. Hann on May 19, 2005 a provisional election was made with traverse to prosecute the invention of Group II, claims 15-19. Affirmation

Art Unit: 3751

of this election must be made by applicant in replying to this Office action. Claims 1-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. The attempt to incorporate subject matter into this application by reference to "[a]ny and all patents, patent applications and printed publications" (par. 0020) is improper because no particular subject matter is indentified thereby.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 15, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castle.

Art Unit: 3751

The Castle reference discloses a toilet seat lid comprising: a body 4; and attention attracting matter 10. The attention attracting matter is provided for the purpose of ensuring the cover is placed in a down position (pg. 1 lns. 13-18). The choice of a map as a particular type of attention attracting matter would appear an obvious choice to be made depending upon personal preference. Both the advertising example disclosed by Castle and the map with personalization disclosed by applicant would serve the same purpose of promoting lowering of the lid.

6. Claims 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castle as applied to claim 16 above, and further in view of Thomas.

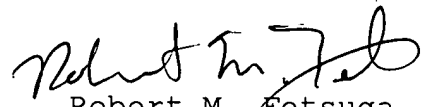

The Castle attention attracting matter is provided in permanent form (pg. 1 lns. 28-31).

Although the attention attracting matter of the Castle toilet lid does not include lamination, as claimed, attention is directed to the Thomas reference which discloses analogous toilet lid which further includes attention attracting matter 4 that is laminated 3. Therefore, in consideration of Thomas, it would have been obvious to one of ordinary skill in the toilet lid art to associate lamination with the Castle attention attracting matter in order to enhance sanitation.
